Protecting Product Integrity

Don’t settle for just checking your seams... Improve them!

Quality By Vision provides affordable and accurate seam quality control and visual seamer setup systems for craft brewers and mobile canners of any size.

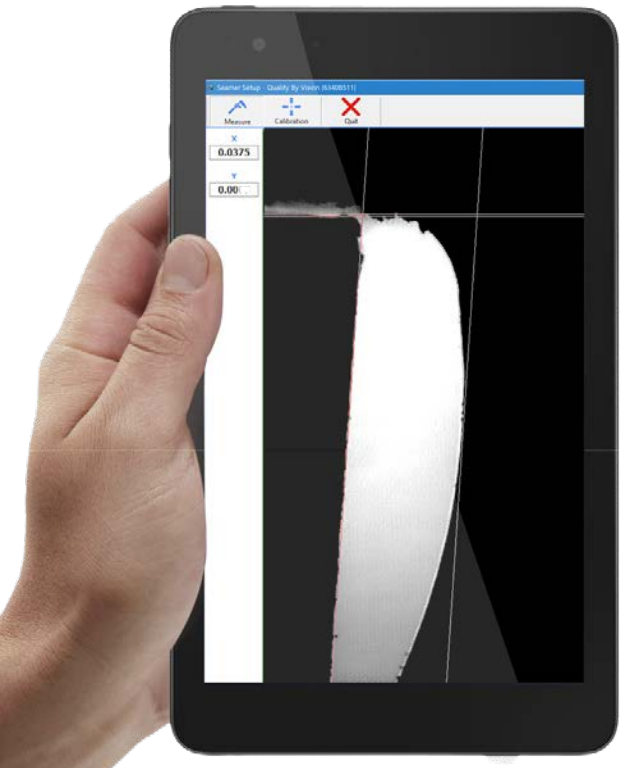
Quality By Vision is the world’s leading supplier of video can seam inspection systems and the world’s only supplier of video seamer setup equipment.

Our tools go beyond merely checking cans for seam issues, they actually solve them by suggesting solutions and by setting up the seamer!

Visual seamer setup:

Improve quality, solve seam issues

Quality by vision’s patented seamer setup camera is the only tool that improves seam quality by solving seaming issues at the source – the roll to chuck relationship and condition at the seamer.



See seaming roll height, thickness change while making adjustments

Monitor tooling and bearing wear without removal

Features:

- Takes the guesswork out of seamer setup
- Fits any seamer, both 1st and 2nd operations
- Ensures the seamer is set right before start up
- Solves seam issues fast and improves quality

Smart Seam Inspection:

Guarantee tight seams, get automatic suggestions

Possible causes, results and solutions for seam defects.

Automatic, instant seam measurements with automatic tips and suggestions when seams are out of specs.

The world's most widely used seam inspection system and the only one that suggests solutions to seam defects.

Features:

- All seam dimensions measured instantly from the seam image
- Plug and play system with easy to understand software
- Includes full color reports with specs and seam images
- Automatic alerts for out of spec seams and suggested solutions

Also available:

Seam Strippers

Digital Gauges

Seam Saws
