Orange Bottle - Torque checking bottle

for easy verification of torque measuring systems

Orange Bottle with hexagonal head

DESCRIPTION:

The Orange Bottle is used to verify the operational repeatability of torque measuring instruments. This bottle is constructed with high energy permanent magnets and is preset at the factory to a customer specified torque of between 5 to 15 inlbs. Each Orange Bottle is labeled with its exact torque rating and repeats to an accuracy of +/- 0.2 in-lbs.

ADVANTAGES:

- High reproducibility
- Quick verification of the system
- Delivered with customer specified cap
- Set to customer specific torque value

OPERATION:

The Orange Bottle can be used instead of a real bottle for torque measuring. The value from the torque instrument can be compared with the Orange Bottle and should be in range of the deviation.

TECHNICAL DATA:

Accuracy:	+/- 0.2 in-lbs
Height:	200 mm (approx.)
Diameter:	68 mm (approx.)
Weight:	1.5 kg (approx.)
