

Product Manager

Description

Operating in more than 75 countries, Industrial Physics is the world leader in packaging and product integrity testing equipment. We serve our customers from five segments: beverages and canned goods, flexible packaging, inks and coatings, materials testing and product integrity.

Within the Industrial Physics group, Industrial Physics Inks & Coatings develops, manufactures and sells instruments for testing, measuring and analyzing inks, coatings and general surface treatments from its facility in Capelle aan den IJssel. Our brands in this segment include TQC Sheen (coating testing equipment), C&W Specialist Equipment (corrosion and environmental test cabinets) and Fibro (measuring equipment for dynamic surface properties).

Overview

We are looking for an inquisitive Product Manager focused on optimizing and maximizing the value of the products and services offered by IP. Do you feel comfortable working with all departments within an organization? Then respond to this vacancy!

We are looking for a hands-on type who also enjoys picking up and solving issues in our lab or at a customer's site. This includes tools, software testing and answering customer questions and possibly turning them into New Product Ideas.

Location:

Capelle ad IJssel, Netherlands

What are you going to do?

The main responsibilities of this position lie in maintaining the integrity of the product portfolio, the commercialization of this portfolio but also increasing the level of knowledge, internally and externally, of IP products.

Main duties include:

- Provide input to the development of new products;
- Growing the knowledge database;
- Generate and maintain technical and application information for product documentation;
- Provide product training to sales channels (internal and external);
- Providing technical articles for magazines and lectures;
- Launching new products, including launch plan and training;
- Optionally representing IP in standardization organizations (NEN-DIN-ISO-ASTM);
- Providing support to distributors and customers;
- Maintain competitive overviews;
- Price list maintenance.

What else is on your resume:

- HBO working and thinking level;
- Affinity with equipment;
- Experience in the paint industry, laboratory or inspection is a plus;
- Knowledge of ISO-ASTM standards used in the coating industry is a plus;
- Affinity with physics, materials science and chemistry;
- Flexible and structured;
- Commercial affinity.

What you can count on

An informal, pleasant and collegial working environment with good primary and secondary working conditions that include a competitive salary, excellent pension plan, bonus scheme, company car and room for personal development. A fixed-term contract with a view to permanent employment.

Become part of our team! If you are interested in this position, please send your CV to jobs-ic@industrialphysics.com. Do you have any questions? Call or email Monique Westerduin: 010 79 00 100 & mwesterduin@industrialphysics.com.
